PSYC 3018 – Abnormal Psychology

Unit of Study Code: PSYC3018

Coordinator: Dr Marianna Szabó
Office: 417 Brennan-MacCallum Building
Phone: 9351 5147
E-mail: Marianna.szabo@sydney.edu.au

Other Teaching Staff: Dr Maree Abbott
Office: 154, Mackie Building
Phone: 9351 2644
E-mail: maree.abbott@sydney.edu.au

Dr David Hawes
Office: 440 Brennan MacCullum Building
Phone: 9036 5223
Email: david.hawes@sydney.edu.au

Dr Evelyn Smith
Office: 303B Griffith Taylor Building
Phone: 9931 9153
E-mail: evelyns@psych.usyd.edu.au

Dr Niko Tiliopoulos
Office: 448 Brennan MacCallum Building
Phone: 9036 9223
E-mail: niko.tiliopoulos@sydney.edu.au

Format of Unit: 2 x 1 hour lectures/week x 13 weeks
1 x 2 hour tutorial/week x 10 weeks

Credit Point Value: 6 Credit Points

Prerequisite: 12 credit points of Intermediate Psychology Unit of study from PSYC (2011 or 2111), PSYC (2012 or 2112), PSYC (2013 or 2113) and PSYC (2014 or 2114).

Assessment: a) Formal Assessment:
60% One 2hr exam
25% One 2000 word essay Due date: 04/05/12 (Friday week 8)
10% Tutorial presentation Due date: weeks 4-11 tutorials
5% Online Quiz Due date: week 12

b) Out of class prescribed student workload
2hr/wk library research (essay & tutorial presentation)

Evaluation of teaching and learning: Date: week 13 of semester
Type: questionnaire
Unit of study general description:

This unit of study critically examines core issues in Abnormal Psychology. These include the conceptual and theoretical bases of the definition and classification of abnormal behaviours, as well as the diagnosis, explanation and treatment of psychological disorders. The unit of study will include topics such as:

(a) Adult abnormal psychology: Anxiety disorders, Mood disorders, Schizophrenia, Personality disorders; Addictive disorders; Eating disorders
(b) Child abnormal psychology: Attention Deficit Hyperactivity Disorder; Conduct disorder; Anxiety disorders, Depression.

Graduate Attributes and Student Learning Outcomes

This course is structured around the graduate attributes associated with the scientist-practitioner model, the basis for the training of psychologists in Australia and internationally. Graduate Attributes are the generic skills, abilities and qualities that students should acquire during their university experience and the School of Psychology is committed to providing an environment to promote these skills. This unit of study will provide students with generalised and transferable skills that will also be useful in careers outside psychology. The following graduate attributes and student learning outcomes will be developed through the course and assessed primarily in the major essay, tutorial quiz, student presentations, and exam.

1: Knowledge and Understanding of Abnormal Psychology

Display knowledge and understanding of the major concepts, theoretical perspectives, and empirical findings in research on abnormal psychology.

Student learning outcomes:
(ii) Ability to describe, explain and evaluate major theories and research studies examining the definition, causes and treatment of various psychological disorders, including Mood disorders, Anxiety disorders; Addictive disorders; Eating disorders, Schizophrenia, and Personality disorders in adults.
(ii) Ability to describe, explain and evaluate major theories and research studies examining the definition, causes and treatment of common childhood disorders, including Mood disorders, Anxiety disorders, Attention Deficit Hyperactivity Disorder and Conduct disorder.

2: Research Methods in Abnormal Psychology.

Understand and evaluate basic research methods used in Abnormal Psychology, including research design, data analysis and interpretation, and the appropriate use of technologies.

Student learning outcomes:
(i) To develop a critical understanding of the major methods of research in these areas.
(ii) To interpret statistical analyses.
(iii) Use web-search, word-processing, database, and email programs.

3: Critical Thinking Skills in Abnormal Psychology

Respect and use critical and creative thinking, sceptical inquiry, and the scientific approach to solve problems related to thought and behaviour.

Student learning outcomes:
(i) Demonstrate an attitude of critical thinking that includes persistence, open-mindedness, and intellectual engagement.
(ii) Evaluate the quality of information, including differentiating empirical evidence from speculation.
(iii) Use reasoning and evidence to recognise, develop, defend, and criticise arguments.

University of Sydney – Syllabus of Senior Psychology 3, 2012
4: Values in Abnormal Psychology
Value empirical evidence; act ethically and professionally; and understand the complexity of sociocultural and international diversity.

Student learning outcomes:
(i) Recognise and respect social, cultural, linguistic, spiritual and gender diversity.
(ii) Use information in an ethical manner (e.g., acknowledge and respect the work and intellectual property rights of others through appropriate citations in oral and written communication)
(iv) Be able to recognise and promote ethical practice in research.
(v) Promote evidence-based approaches to understanding behaviour.

5: Communication Skills in Abnormal Psychology
Communicate effectively in a variety of formats and in a variety of contexts

Student learning outcomes:
(i) Write a standard literature review or case report using American Psychological Association (APA) structure and formatting conventions.
(iii) Demonstrate effective oral communication skills in various formats (e.g., debate, group discussion, presentation) and for various purposes.
(iv) Collaborate effectively, demonstrating an ability to: work with groups to complete projects within reasonable timeframes; manage conflicts appropriately and ethically.

6: The Application of Abnormal Psychology
Understand and apply psychological principles to personal and social issues.

Student learning outcomes:
(i) To develop an awareness of the applications of the theories and research findings of Abnormal Psychology in society.
(ii) To develop an ability to critically evaluate media representations of mental health issues in society.

Evidence of learning:
During the semester, the learning outcomes will be assessed through participation in tutorial discussions, presentation, online quiz, and the written assignment. At the end of semester, a multiple-choice + short answer exam will assess all learning outcomes, including all lecture, tutorial and set reading material.
SYLLABUS (DRAFT ONLY. SUBJECT TO CHANGE.)

PSYC3018 Abnormal Psychology will introduce students to recent knowledge concerning the diagnosis, causation and treatment of mental disorders. The following lecture outline contains the entire syllabus.

|   | 24/05 |                | Eating Disorders 1: Anorexia Nervosa | Evelyn S    |
|12 | 29/05 | 9. Eating Disorders | Eating Disorders 2: Bulimia Nervosa | Evelyn S    |
|   | 31/05 |                | Eating Disorders 2: Binge eating | Evelyn S    |
|13 | 05/06 | 10. Revision / feedback | Sexual Dysfunctions 1. | David H      |
|   | 07/06 |                | Sexual Dysfunctions 2. | David H      |
The tutorial program will begin in week 2. It will involve a mixture of class exercises, video demonstrations and discussions of topics related to lectures. Tutorial presentations of set readings by students will form an integral part of tutorials from week 4 to week 12. A list of set readings and additional references will be available in the first tutorial.

Academic Dishonesty and Plagiarism

1. It is your responsibility to know what academic dishonesty and plagiarism are.

   Here is the link to the University’s policy:
   

   Make sure that you understand what counts as academic dishonesty and the various types of plagiarism. The Library’s http://www.library.usyd.edu.au/skills/ ‘Plagiarism and Academic Honesty’ program will help.

2. Note that:

   i) the School of Psychology will penalise all submitted work that is plagiarised.

   ii) Students should note that all assignments (including group projects) will be run through similarity detecting software. This software detects similarities between (a) your assignment and both print and online sources, and (b) assignments submitted by other students, from both current and previous years. If similarities are found, they will be investigated so as to determine the nature of the plagiarism. See Part 5 of the University's policy.

Avoiding plagiarism – key points

• Plagiarism is a serious offence and may result in failure in the course. Even where students are completing an exercise together, each student must submit separate written work. Incorporation of any material from another student’s assignment is regarded as plagiarism.

• In writing essays or reports to meet coursework requirements, you should use your own words. In some contexts (e.g., theoretical research) it is appropriate to use an occasional quotation. This should be indicated in the conventional way by enclosing the passage within quotation marks and by providing a precise (page number) reference for the source of the quote. In many contexts, especially reports of empirical work, quotations are best avoided.

• “Using your own words” means that you should not borrow from the writing of others – whether from fellow students or published authors. For example, it is not acceptable to base an essay on text from various sources that you have then edited to some degree – even if you cite these sources. First of all, there is the ethical issue arising from the dishonesty of presenting as your own work something which is essentially the work of others. In addition, there are good educational reasons for avoiding this, even where you feel that someone else has expressed some idea far more clearly than you could. One reason is that you must learn to express yourself clearly in writing; like most other skills, this only comes with practice. Another, is the failure to understand information or ideas at all thoroughly if all you have done is reproduce (with some editing) what someone else has written about the topic.

• When you express in your own words what you have learned from various sources, you should cite each source. The standard convention for most written work in psychology is to
list references at the end of your essay or report, rather than, for example, to use footnotes. To express some idea without giving a citation implies that it is your own idea. Therefore, if it is in fact an idea obtained from someone else, this needs to be acknowledged. Listing a set of sources implies that you have read them all. Therefore, you should list as references only those you have actually read. If you are depending on a secondary source, then make this clear, e.g., ... salivary conditioning (Pavlov, 1927; cited in Mazur, 1998).

- The points made here also apply to non-textual material. For example, graphs or tables of data included in a report should be your own work and not copied from others. Very occasionally you may need to ‘quote’ a figure from some other source; if you do so, you should make its origin quite clear.
- In general, avoid letting other students use your work for any kind of assessment. On the rare occasion where this may be appropriate, make sure that the other student acknowledges your contribution as the original author.
- In some cultures, students show their respect for a teacher by copying what the teacher has said or written. In Australian University education, copying a teacher (even if paraphrasing) is plagiarism if the source is not cited.
Research and resource support for Psychology students

The University of Sydney Library has 12 libraries in different locations, on different subjects with different facilities. Fisher Library is where you will find the physical collection of most relevance to your Psychology studies. Fisher Library is located on Eastern Ave, Camperdown campus. We also have loads available online – find us at sydney.edu.au/library/

Matthew Davis is the Faculty Liaison Librarian for Psychology. Matthew is available to help you find and use library resources for your assignments or research. You can email him at library.psychology@sydney.edu.au or phone on 9351 3629. The Psychology Librarian is located at Badham Library, level 1, Badham Building, Science Rd, Camperdown Campus.

Psychology books in high demand

The 2 hour collection is located on Level 3 of Fisher Library. Most of your required and recommended items from the reading lists will be here. You can find a list of your required readings in the catalogue by searching under your Unit of Study code http://opac.library.usyd.edu.au/search/r

Some material in the list is also available to read online.

Psychology subject guide

There is a comprehensive subject guide that includes links to psychology databases, internet resources, information on tests and measurements, referencing guides, and much more. Take a look at http://libguides.library.usyd.edu.au/psychology

You can also enrol in free research, database and EndNote training classes on this site.

Need a refresher after the long vacation?

Watch and listen to these online learning objects and get back up to speed with information literacy skills on topics such as research, essay writing and referencing.
